

The Transgender Cult Captures White Children The Most

why?

COURAGEISAHABIT.ORG

CAPTURED

Statistically, children who are captured by the Transgender Cult have some level of autism (40%+) and/or suffer from pre-existing comorbidities such as anxiety, depression, OCD, bulimia, and self-harm.

However, this does not explain why the Transgender Cult has disproportionately impacted white kids, with a large percentage being girls. In a recent study released by JAMA Pediatrics, between 2016-2019 nearly 78% of minors (12-17 years old) who received Transgender mutilation surgeries were white.

Why is this?

OBSERVATION:

The biggest advocates for children getting double mastectomies or castration are woke suburban parents, in particular white mothers.

Mostly **YOUNG WHITE FEMALE SCHOOL COUNSELORS AND TEACHERS** come from academia that have long been political indoctrination machines. Women's natural high sense of empathy is leveraged to easily brainwash them into believing that all white people are oppressors, thereby creating an endless flow of white guilt.

From this bottomless pit of self-flagellation, these woke young women will propagate any and all political agendas like missionaries deployed to 3rd world countries; even if that agenda mutilates their own children. *"I'm here for it"*, they will say.

White children are raised in a culture where every societal institution labels them as "evil privileged oppressors." This message echoes from school counselors and teachers to social media, and even their own parents pass down this manufactured white guilt.

By middle school, these children will frantically search for any "marginalized" group to join. They can't change their skin color, but they can pretend to change their sex. Finally, they are "seen." More crucially, they gain protection and high social value, a status they've never known before.

They instantly go from the oppressors to the oppressed.

RUSH OF DOPAMINE

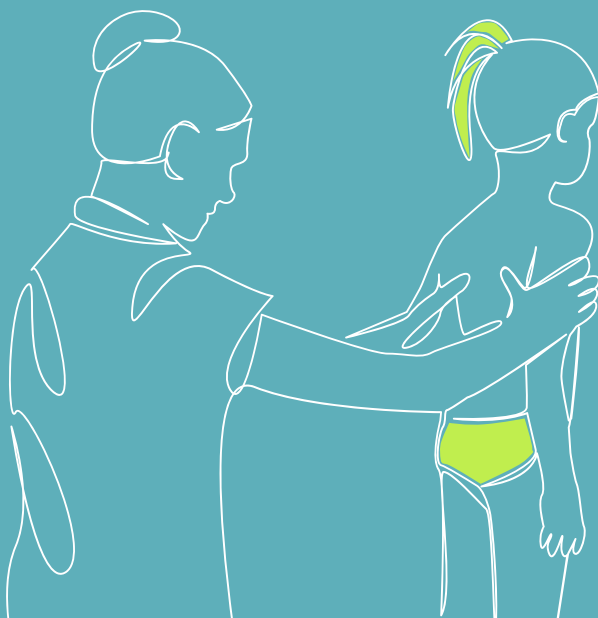

DEEPLY ADDICTIVE

The rush of dopamine from intense love-bombing and newfound social value becomes deeply addictive for these white children. To sustain it, they must continually expand their identity, terrified of being cast out of the tribe and thrust back into the isolating wilderness of being "just white."

This escalation starts with pronoun announcements, progresses to name changes, then moves to breast binding and irreversible transgender drugs, culminating in mutilation surgeries. Each step in the transgender process becomes a desperate chase for the next dopamine fix.

In the past, wise parents would guide their children away from dangerous impulsive choices.

Now, woke white mothers EAGERLY offer up their children on the altar of the transgender cult to ease their own white guilt.

THE DATA

DAILY WIRE

NEWS

New Data Emerges Of 1,100+ Adolescent 'Gender Affirming' Mastectomies

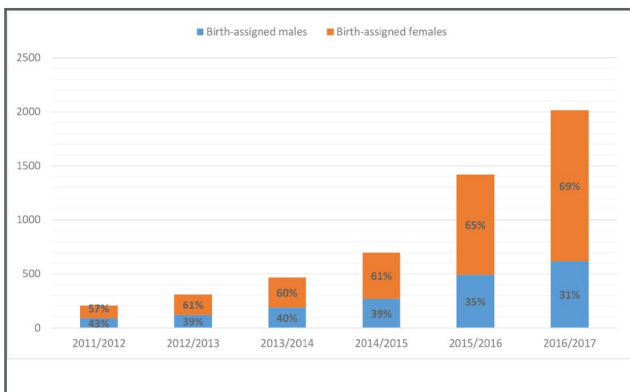

By Christina Buttons · Nov 11, 2022 · DailyWire.com · [f](#) [t](#) [d](#)

dima_sidelnikov via Getty Images

Transgender Double Mastectomies

There has been a 389% increase in adolescent girls (ages 12-17) obtaining chest surgeries of which 78% of patients were white.

Autism

Around 35% of referred young people present with moderate to severe autistic traits.

Median Household Income

Counter the narrative.

2025 DATA UPDATE

TRANSGENDER DOUBLE MASTECTOMIES

The estimated increase in transgender double-mastectomies among adolescent girls (ages 12-17) from 2020 to 2024 is **300% to 500%**. This is not from a single study covering the full period, as no such data exists yet as of March 2025, but a synthesis of prior trends, insurance data, and anecdotal insights.

- **Baseline:** JAMA Network Open, 2023.
- **Growth Rate:** 30-50% annual increase post-2020, moderated from 91% pre-2020 (Cureus, 2023; KFF, 2024).
- **Anecdotal Boost:** X posts and AP News (2023) suggest ongoing demand.
- **Regional Factor:** Growth in permissive states offsets bans (Health Affairs, 2024).

APPENDIX

EXAMPLES OF MANUFACTURED WHITE GUILT

"I'm grossly unworthy to be next to these guys at this event...(I will) share my ongoing journey of realizing & dealing with how deeply imbedded [sic] white supremacy was in my OWN thinking."

White Women. Everything you already know about your own racism and how to do better.

CALL TO ACTION

1. The best way to protect your children is to reject the notion of white guilt. That lie is an effective tool to leverage your kindness so you're too weak to stand up for your own children.
2. The next time you are faced with a Child Mutilation Advocate (CMA), ask them the one question they cannot answer: "Nearly 78% of minors (12-17 years old) who received Transgender mutilation surgeries were white. Why is this?"
3. Bonus challenge: Ask a CMA to find a photo of a Chinese, Indian, Muslim, Japanese, Filipino or South African mother smiling ear-to-ear next to her daughter with double mastectomy scars.

COUNTER

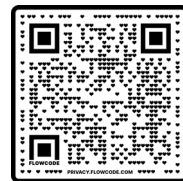

Transgender cultists might claim that white women's higher earnings allow them to fund mutilation surgeries. This excuse falls apart when you consider that Asians, with a higher median household income than whites, show almost no trace of the transgender social contagion within their families.

**IF YOU DO NOT STAND UP
FOR YOUR CHILDREN TODAY**
THEY WILL LIVE ON THEIR KNEES TOMORROW
