CMA's WILL SAY

Child Mutilation Advocates will lie to you and say, “*Children must go through a long, rigorous evaluation process to receive transgender drugs.*” Here are 3 resources to completely expose and debunk their lie. Pick 3-5 facts so you can counter them quickly. Once you expose their lie, they will pivot to their favorite emotional blackmail, “*Suicide!*”

Don't fall for it. Instead, make them answer why they said the lie in the first place. Stay on offense.

INDEX

¹Ischemic Stroke: An ischemic stroke occurs when a blood clot blocks a blood vessel supplying blood to the brain, leading to a lack of blood flow and oxygen to brain tissue. This can cause damage to brain cells and result in various neurological symptoms, such as weakness or paralysis on one side of the body, speech difficulties, and vision problems.

²ST elevation myocardial infarction (STEMI): ST elevation myocardial infarction (STEMI) occurs when there is a complete blockage of one of the major arteries that supply blood to the heart muscle. The interruption of blood flow to the heart can cause significant damage to the heart muscle, and if not treated promptly, can be life-threatening.

³Pulmonary embolism: Pulmonary embolism is a blockage in one of the arteries in the lungs. This can lead to serious health complications, such as damage to the lungs and other organs, and even death.

CALL TO ACTION

1. Parents must reject pronoun enforcements as that is the first step leading to transgender drugs. Download the “[Safety & Inclusion Express](#)” to learn about why Child Mutilation Advocates push pronouns so aggressively.
2. Fill in the opt-out form below and keep your child away from “mental health professionals” in school.
3. Share this with parents in your community to dispel the lie that children go through years of mental evaluation before body-destroying drugs are given to them.
