

LD 394

LD 1735

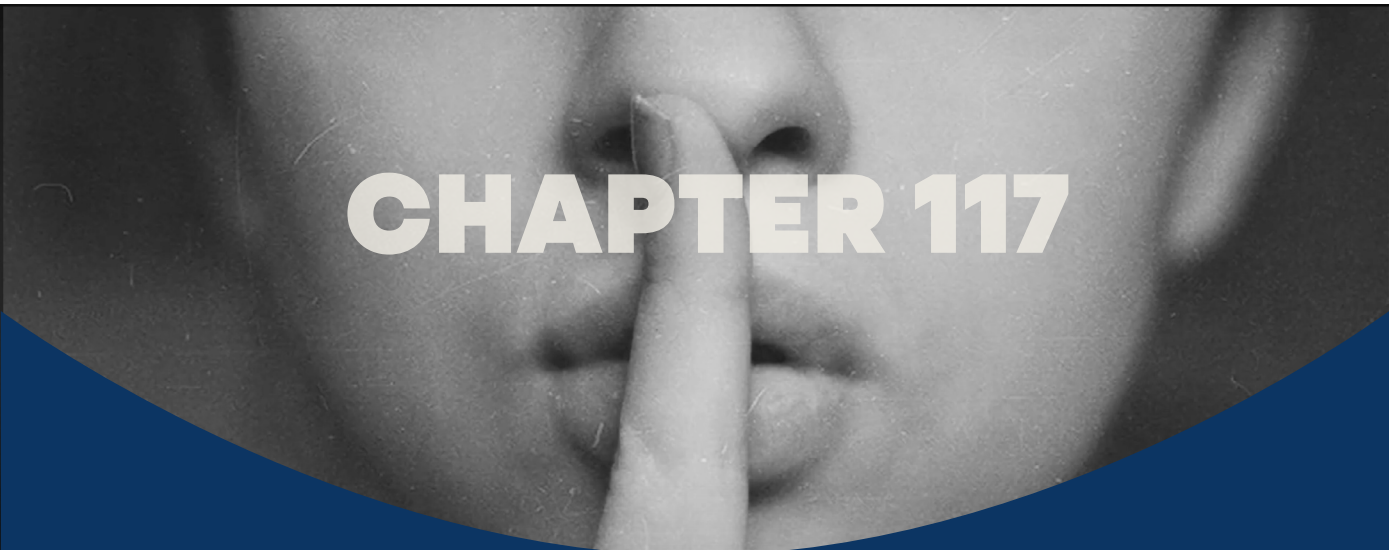

**RECRUITING & TRAFFICKING
CHILDREN TO
TRANSGENDERISM**

LD 535

LD 1040

CHAPTER 117

- Allows school counselors and social workers to keep Transgender secrets from parents.
- Deems parents who do not agree with the Transgender social contagion as “unsafe and abusive”.
- Justify hiring more school counselors and social workers because they are required to spend 80% of their time “working” with students.

LD 394

SECRETS FROM PARENTS

- Allows minors to travel to Maine to obtain Transgender drugs and surgeries.
- Parents will be denied custody if they do not support Transgender procedures.
- Will not honor custody agreements of the parents' home state.

LD 1735

BILL DEFEATED 12-0 IN JANUARY 2024

***STATE
SANCTIONED
TRAFFICKING***

Consent

- 16-year-olds will not need parental consent to obtain irreversible Transgender drugs
- 7-year-olds will be able to consume irreversible Transgender puberty blockers with parental consent.
- Protects hospitals and doctors from future lawsuits due to Transgender damages.

LD 535

***LOWER AGE OF
CONSENT***

TAXES

- Transgender surgeries and drugs funded by taxpayers.
- Medicaid will reimburse providers for giving Transgender drugs and performing Transgender surgeries.
- No age or citizenship status restrictions on who can qualify.

LD 1040

***TAXPAYER
FUNDED***

HOW THESE BILLS WORK TOGETHER

These four bills will collaboratively aim to expedite the process of separating children from their parents by using Transgenderism as a justification.

LD 394 is the foundational legislation because it allows Transgender secrets be kept from parents by K-12 school counselors, social workers, and teachers. The underlying justification of this bill rests on the unfounded assumption that parents who do not affirm their child's manufactured gender identity are inherently "unsafe and abusive." The prevailing school environment fosters the spread of Transgender social contagion among students while portraying parents as a potential threat. This bill is the recruitment efforts for the Transgender Cult.

LD 1735 enables the state to intervene in cases involving out-of-state children, allowing for the potential removal of parental custody if the parents do not support horrific Transgender drugs or surgeries. Moreover, this bill disregards any existing custody agreements from the parents' home state, opting instead to place the children in foster care until the completion of transgender treatments. This legislation is state-sanctioned trafficking. The underlying rationale for this bill is an extension of the flawed premise established by LD 394, which falsely portrays parents as being unsafe, abusive, and potentially endangering their children's lives by not consenting to irreversible and harmful Transgender procedures.

LD 535 lowers the age of consent regarding irreversible puberty blockers and cross-sex hormone drugs. Under this bill, a 16-year-old minor would be able to initiate Transgender medication without parental consent. Additionally, it permits children as young as 7-years-old to undergo transgender treatments with the approval of their parents. Furthermore, this bill creates additional obstacles in pursuing legal action against doctors and clinics in the future, particularly when individuals realize the implications of the procedures they have undergone during their childhood.

LD 1040 is the legislation that allocates taxpayer funds to cover the expenses of Transgender medications and surgeries outlined in LD 1735 and LD 535. This enables hospitals and clinics to receive reimbursement through Medicaid. It's important to note that, similar to the standard Medicaid requirements, families above a specific household income threshold will not be eligible. However, in cases where children are removed from parental custody, they will qualify for coverage. Additionally, under this bill, a minor's immigration status does not disqualify them from utilizing Medicaid for Transgender-related drugs or surgeries.

Ultimately, these bills will undergo further modifications within the next two years, with the aim of progressively reducing the age of consent for Transgender procedures. The objective is to establish legal provisions that would permit 9-year-olds to initiate Transgender drugs and 14-year-olds to undergo Transgender surgeries without requiring parental consent.

YOU MAY NOT CARE ABOUT POLITICS

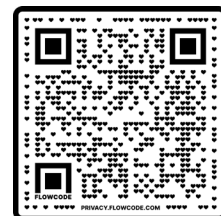

BUT POLITICS CARE ABOUT YOUR CHILDREN
